TNB's Ulu Jelai plant to boost capacity

TENAGA Nasional Bhd's (TNB) RM4.2 bil Ulu Jelai hydroelectric project will boost the national utility's ability to meet the surge in demand at peak hours. Construction of the Ulu Jelai plant, which is TNB's second, new, green-energy power plant after over 15 years, would be completed in the third quarter this year. Once completed, the plant located in Cameron Highlands, Pahang, would add another 372MW to TNB's hydroelectric generation capacity of 2,161MW.
