Michelin and Petron conduct Road Safety Programme

MICHELIN and Petron recently conducted their fifth Road Safety Programme at Universiti Tenaga Nasional (Uniten), with more than 5,000 students attending.

The programme is to raise awareness on the importance of tyres and to educate the students on basic tyre safety, particularly on air pressure information and how to measure tread depth.

"The event was effective in making me realise the importance of tyres to road safety. Knowing how to check the tyre pressure and its tread depth are essential for students, as most of us drive to university," said Uniten student Amir Ridhwan Ahmad Fauzi.

Previously, four universities took part in this programme, which were Universiti Teknologi Malaysia School of Professional and Continuing Education, Universiti Malaysia Pahang, Universiti Sultan Zainal Abidin and UiTM Johor.

"Michelin places utmost importance on ensuring our tyres are of the highest safety standards, in all road conditions. We are pleased with the overwhelming response and are committed to continue educating students on proper tyre awareness and maintenance skills for a safer driving experience," said Michelin Indonesia, Malaysia, Singapore & Brunei Darussalam public affairs and corporate communication director Nora Guitet.
